1965

UNIVERSITETSFORLAGET

# NORSK GEOLOGISK TIDSSKRIFT

*The journal of the Norwegian Geological Society*

*Editor:*

Head Curator J. A. Dons  
Geologisk Museum, Sarsgt. 1, Oslo 5, Norway

*Editorial Committee:*

Professor T. F. W. Barth                      Professor J. A. W. Bugge  
Professor A. Heintz                              Professor O. Holtedahl  
Professor T. Strand

---

The journal is published each year in 4 numbers which form one volume.

**Members** who have paid their fee (N. kr. 25.— per annum) receive the journal from Universitetsforlaget. Membership fees, changes of address and requests from members concerning the journal should be sent to the Treasurer, Norsk Geologisk Forening, Geologisk Museum, Sars gate 1, Oslo 5.

**Subscribers** to the journal (non-members of Norsk Geologisk Forening) send their orders to Universitetsforlaget. Subscription prices per annum (postage included) and postal accounts are as follow:

Norway:	N. kr. 45.—	postal account	1 55 30	Universitetsforlaget
Denmark:	D. kr. 45.—	Danish postal acc.	1 49 54	—»—
Sweden:	Sw. kr. 33.—	Swedish postal acc.	43 37	—»—
USA & Canada:	\$7.50			

Single issues and complete volumes can only be obtained according to stock in hand when the order is received. Prices, which are subject to change without notice, are available upon request.

A subscription runs until cancelled by the subscriber, unless a cancellation date is specified in the original subscription order.

UNIVERSITETSFORLAGET  
University Centre, P. O. Box 307, Blindern  
Oslo 3, Norway

## INSTRUCTIONS TO AUTHORS

**Manuscripts** are to be sent to the Editor. The author's permanent and temporary addresses are to be given. The text must be clear and concise. English is the language preferred; however, Norwegian, Swedish, Danish, German, or French may be used. With *all* articles a short abstract in English is to be supplied by the author. Articles written in one of the Scandinavian languages are to have a sub-title and Figure texts in English. Authors of English articles may use either British or American orthography. British orthography is to

conform to the *Oxford English Dictionary* or the *Shorter Oxford English Dictionary*; American to *Webster's New International Dictionary of the English Language* (Second Edition). Authors whose native language is not English must supply a statement of correctness from a native English speaking expert.

Manuscripts are to be typewritten (double spaced). Carbon copies are not acceptable. Footnotes are to be typed immediately under the line to which they refer, not at the bottom of the page. Figure texts are to be gathered on a separate page. Abbreviations used are to be those of *Suggestions to Authors of the Reports of the United States Geological Survey* (Fifth Edition, 1958). The following are not italicized: i.e., e.g., viz., cf., and etc. Italicize *et al.* Fig. and Table are capitalized in the text.

**Illustrations** must be limited to those absolutely necessary and be reducible to a maximum size of 11 × 17 cm. Lettering on illustrations must be at least 1 mm high after reduction. Drawings are to be in India ink. Photographs are to be clear, sharply contrasted, and with glossy finish. Figure texts and all illustrations are to be numbered and have the author's name on them. When not obvious, the top and bottom of an illustration should be indicated.

**References.** In the text, reference to other works is by author's name and year of publication. Page number may also be given. The References list is to be set up in conformity with the examples given here:

- BASKIN, Y. 1956. Observations on heat-treated authigenic microcline and albite crystals. *Jour. Geol.* 64:219-24.
- ITO, T. and SADANAGA, R. 1952. The lamellar structure of certain microcline and anorthoclase. *Acta cryst.* 5:441-49.
- BARTH, T. F. W. 1962. *Theoretical Petrology*, 2nd Ed. John Wiley & Sons, Inc., New York, 416 pp.
- DONS, J. A. 1960. Telemark supracrustals and associated rocks. *In* Høltedahl, O. *Editor*, *Geology of Norway*. Norges geol. undersök. No. 208:49-57.
- REITAN, PAUL H. 1960. The genetic significance of two kinds of basified zones near small pegmatites. *Int. Geol. Congress XXI, Part XVII:102-07.*
- VOGT, J. H. L. 1931. The physical chemistry of the magmatic differentiation of igneous rocks. III. 2nd half. *Skr. Norske Vid.-Akad. Oslo. I. Mat.-Naturv. Kl.* 1930. No. 3, 242 pp.

**Proofs** of articles will be sent to an author once or twice, dependent on the nature of the material. The author is expected to read the proofs most carefully and to return them as promptly as possible to Universitetsforlaget. Author's alterations in the proof will be charged to the author.

Fifty offprints are sent free of charge to an author. In cases of multiple authorship, 75 offprints are sent to the team. Offprints in addition to the free ones should be ordered when the first proofs are returned to Universitetsforlaget.

# INNHOLD

## *Contents*

Norsk Geologisk Tidsskrift. En orientering og takk ved foreningens formann .....	i-iii
ELLIOTT, R. B. and MORTON, R. D.: The nodular metamorphic rocks from the environs of Kragerö, south coast of Norway.....	1
BURRELL, D. C.: The geochemistry and origin of amphibolites from Bamble, South Norway. I. The determination of zinc in amphibolites by atomic absorption spectroscopy.....	21
REITAN, P. H.: Pegmatite veins and the surrounding rocks. V. Secondary recrystallization of aplite to form pegmatite .....	31
HEIER, K. S.: A geochemical comparison of the Blue Mountain (Ontario, Canada) and Stjernöy (Finnmark, North Norway) nepheline syenites	41
HEIER, K. S.: Boron in pegmatite minerals .....	53
DONS, J. A.: The Precambrian rocks of the Telemark area in South Central Norway. IV. Calcite syenite with marginal breccia at Fjone ....	57
ROSENQVIST, I. TH.: Electron-microscope investigations of larvikite and tönsbergite feldspars.....	69
HEINTZ, A. E. and GARUTT, V. E.: Determination of the absolute age of the fossil remains of mammoth and woolly rhinoceros from the permafrost in Siberia by the help of radio carbon (C <sub>14</sub> ) .....	73
OFTEDAL, I.: Note on the apparent substitution of boron for beryllium in minerals .....	81
BARTH, T. F. W. and THORESEN, K.: The attitude of the rhombic section in triclinic feldspars (with a note on diclinic crystals) .....	83
